

SEN-9425P-24V-RW

Unmanaged 4 x 10/100/1000 PoE+ & 1 x 10/100/1000 RJ45 & 2 x GbE SFP Switch, Railway Approval

Description

Switch when used in railway applications has to hold certain certification to prove its ability whether it can be best fit for it or not. SEN-9425P-24V-RW is certified with and EN 50155 and EN 50121-4 to use in railway applications so that it makes you feel trustworthy to use for surveillance or ticketing network in railway and bus stations. EN 50155, EN 50121-4 and EN 61373 certificates guarantee trustworthy operation in critical environments where vibration and shock are common place. With IP30 protection it exhibits extreme tolerance in harsh temperature environment ranging from -40°C to 75°C.

SEN-9425P-24V-RW is built with 24V input and its Power Booster technology boosts power up to 30W per port with available 24V voltage to feed surveillance cameras, wireless access points, IP phones and other PoE enabled devices. Complied with 4 PoE+ (IEEE 802.3af/at) Gigabit copper ports, the switch eliminates the need of running separate cables for power and data. 2 GbE SFP slots gives the advantages of configuring daisy chain topologies offering full-proof fiber advantages for a safe, reliable and long distance Gigabit connectivity.

Features Highlight

Robust Switch Performance

SEN-9425P-24V-RW is enclosed within IP30 aluminum case and can able to sustain harsh temperature ranging between -40°C ~ 75°C. Besides, the switch is built with various protection features such as ESD Protection, Surge Protection, and Power Consumption Protection to deliver non-stop PoE service to the Powered Devices. Eventually, these features reduce the replacement cost of damaged units.

Efficient Power Booster Support

There are many places such as small factories, workstations where the voltage supply is not sufficient for PoE operation. Hence to deal with this situation, SEN-9425P-24V-RW is designed with innovative power booster technology which can support DC voltage input 24V~57V DC for IP surveillance saving additional cost and space for an external voltage converter.

High-Power Budget for PoE Network Devices

SEN-9425P-24V-RW is capable of delivering PoE power up to 30W per port (IEEE 802.3af/at) to PoE+ compliant powered devices (PDs). Addition to this, the switch allows simple "plug and play" PoE for various types of high power consuming PoE devices to scale up the network. Thereby, irrespective of their location, powered devices can be powered without installing additional power outlets or cabling and significantly reduce your CAPEX.

Hardened DIN-Rail-mounted Power Adapter (AC to DC)

SEN-9425P-24V-RW is designed with 4-pin mini-DIN power connector and adjustable DIN-Rail power holder which can easily power up the PDs and prevents from accidental power shutdown due to losing power.

Surveillance Applications

Sufficient PoE Power with Cost-saving Fiber Connectivity

The intelligent PoE+, compactable size, rugged design of SEN-9425P-24V-RW ensure continuous operations in some special requirements for transportation, factory and outdoor places where high vibration degree, shock, and wide range temperatures are present. Addition to this the dual Gigabit SFP ports which can easily make daisy chain topologies to power more number of PoE+ enable power devices to expand the network connection and saves the amount of fiber cabling connecting to the control room as well. Due to daisy chain architecture, only a single fiber connects to the control room which in turn saves CAPEX.
