HNS-8405P

Unmanaged 4 x 10/100/1000 PoE+ &
1 x 10/100/1000 RJ45 Switch

Description

The HNS-8405P is an Unmanaged Hardened PoE+ switch perfectly suited in harsh environments and an ideal solution to deploy in surveillance systems. The switch is designed to meet the requirements of both power and data transmission over single Ethernet cable to PoE appliances and devices without the need for power outlets, eliminating additional cost of electrical cabling and circuits.

The switch's rugged case and hardened components withstand high degree of vibration, shock and wide operating temperatures from -10°C to 60°C. The HNS-8405P features 5 10/100/1000BASE-T ports to satisfy new and evolving network demands. With 4 IEEE 802.3at compliant ports, the switch provides up to 30W per port to meet the growing demand of high power consuming network devices such as wireless access points, IP cameras, and other powered devices (PDs).

Features Highlight

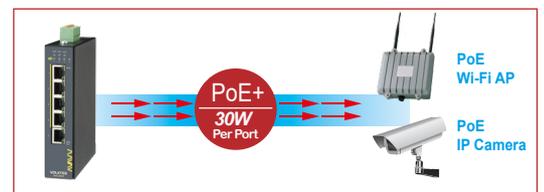

Robust Switch Performance

With IP30 metal case, surge and ESD protection, the HNS-8405P provides a high level of immunity against electromagnetic interference and heavy electrical surges which are easy to deploy in industrial environments. Furthermore, the HNS-8405P offers high performance switch architecture with 5 ports of 10/100/1000BASE-T to meet the requirements of high-bandwidth access Ethernet, Fast Ethernet or Gigabit Ethernet in tough operating temperatures.

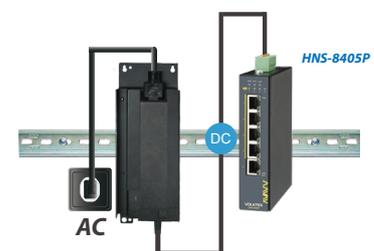

High-Power Budget for PoE Network Devices

To fulfill the growing demand of high-bandwidth, high-power PoE for network applications and eliminating the cost of electrical cabling and circuits, the HNS-8405P is designed under IEEE 802.3at standard PoE. With 120W PoE power budget capability for whole system, the switch allows simple "plug and play" PoE for various types of high power consuming PoE devices. This makes the HNS-8405P a very convenient solution for applications far away from power outlets satisfying PoE extension applications in long distances.

DIN Rail to Power Adapter (AC to DC) & Terminal Block

The HNS-8405P is ideal solution to prevent the failure of single power circuit, in which provides you options to facilitate the 802.3at High Power PoE usage. Either "DIN-Rail Power Adapter" to convert AC to DC for board operation in an easily and firmly installation with hardened connection to the switch unit OR "Terminal Block" which supports primary (PWR) 48VDC and standby (RPS) 48VDC can be used to powering PoE network. Categorized by its compact design, DIN-Rail Power Adapter can easily fit in smaller infrastructures and is extremely simple in installation. Saving your time and space, this adapter can be easily mounted next to switch unit in surveillance applications that have little space available. The second optional power supply through "Terminal Block" provides a low-cost, simple solution to the problem of an inadvertent failure of the internal power-supply, which can result in the shutdown of switching device, the PoE devices attached to its ports, or an entire network.

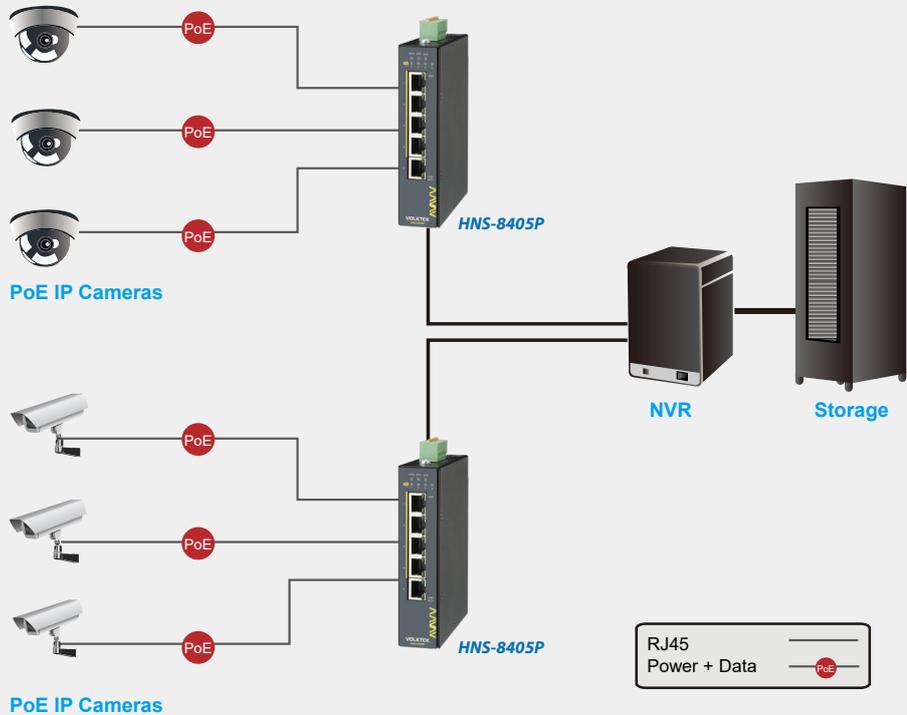

Simplified Installation w/ Compact Size

The HNS-8405P provides varied choice of deployment locations even in small space, harsh environments, quick and easy installation way by its compact size and no configuration required. Every HNS-8405P is equipped with auto MDI/MDI-X on all ports for simple connection to other switches and hubs. When a compliant device is attached, the power supplied will automatically detect and classify to fit the device. With diagnostic LEDs panel, the HNS-8405P allows you to know switch status and simplify troubleshooting.

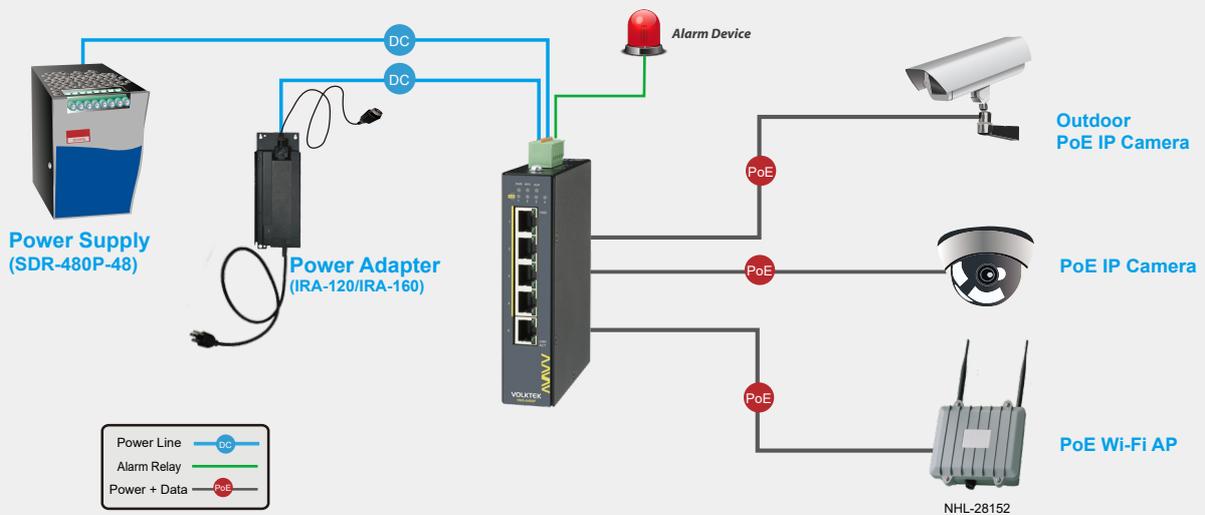

Surveillance Applications

The HNS-8405P combines high-power PoE+, robust performance for surveillance systems in harsh environments. With its compact size, highly reliable and secure features ensure continuous operations in some special requirements for transportation, factory and outdoor places where high vibration degree, shock and wide range temperatures are present.

Applications

The HNS-8405P is compatible with 10/100/1000Mbps through RJ45 transceivers to guarantee a strong, stable connection of Ethernet, Fast Ethernet or Gigabit Ethernet, providing flexible deployment options to satisfy industrial networking requirements.
